

Energy Efficiency and Energy Conservation Awareness Raising in the Education Sector

PROJECT SNAPSHOT

Country: Indonesia

Energy efficiency and conservation (EEC) reduces environmental impact and increase national energy self-sufficiency. This will contribute to Indonesia's commitment to greenhouse has emission reduction. Systematic efforts should be prepared for the future productive-age generation to support the demand side EEC action.

In order to address this, ETP is contributing to reduce the environmental impact, including reducing GHG emissions.

This project will raise the younger generation's awareness on energy efficiency and conservation and will build their energy conservation behavior.

CONNECT

ETP'S CONTRIBUTION

This project delivers supports to reduce in energy consumption in schools and homes, by preparing human resources in assisting the Government of Indonesia in achieving the 17% energy efficiency target in 2025. It increases awareness and capacity about energy efficiency and conservation of students and teachers, encourages changes in the behavior of selected students, teachers and schools and designing bottom-up energy saving policies in schools.

IMPACT

Increased the availability of project finance, de-risk financial instruments and sale of the development of bankable clean energy projects

OUTCOME

Increasing the flow of public and private investments to energy efficiency projects in the energy and end-use sectors

OUTPUTS

Investment grants through the EE Innovation Window to provide grant support in the range of 6-12 EE projects in Southeast Asia

IMPLEMENTATION PARTNERS

Indonesian Institute of Energy
Economics

STAKEHOLDERS

Ministry of Energy and Mineral
Resources (MEMR)

PROJECT DURATION

March 2022 - February 2023

KEY OUTPUTS

- Design and develop a work plan and training modules for energy efficiency and conservation.
- Engage and socialize the program with participating schools.
- Coordinate the official launch of the energy efficiency and conservation program.
- Deliver awareness-raising training to teachers and students on energy-saving practices.
