

Power Development Roadmap for the Bangsamoro Autonomous Region for Muslim Mindanao

PROJECT SNAPSHOT

Country: The Philippines

The Bangsamoro Autonomous Region in Muslim Mindanao (BARMM) recognizes the potential of renewable energy as an important resource in its socio-economic development and lasting peace. As it transitions into an autonomous region, there needs to be a guiding document that will enable sustainable power sector development in the region. As such, the BARMM Power Sector Development Roadmap was formulated using the data and information previously collected by MENRE and through stakeholder engagement and consultations. The Roadmap presents the five strategic objectives of the BARMM power sector development with highlights on the key activities that need to be implemented in the short-, medium, and long-term.

CONNECT

ETP'S CONTRIBUTION

The BARMM is charting a course towards a greener future with the help of a newly formulated Power Sector Development Roadmap. This roadmap, developed with the assistance of ETP, paves the way for BARMM to contribute to the national target of 50% RE in the power generation mix by 2040. The Roadmap goes beyond national targets by ensuring BARMM strives for an optimal power system that is considered sustainable. It achieves this by identifying specific energy transition opportunities and strategic objectives that directly contribute to the development goals outlined in the Bangsamoro Organic Law and Bangsamoro Development Plan 2023-2028.

IMPACT

Increased deployment of RE and adoption of EE in the BARMM power structure

OUTCOME

Enhanced enabling environment to support RE development and EE adoption

OUTPUT

BARMM Power Sector Development Roadmap

ENERGY
TRANSITION
PARTNERSHIP

STRATEGIC OUTCOME 1

Policy Alignment with Climate Commitments

IMPLEMENTATION PARTNERS

Aquatera

STAKEHOLDERS

Ministry of Environment, Natural
Resources, and Energy (MENRE)

PROJECT DURATION

March 2023 - September 2023

Key Outputs

- Delivering a BARMM Power Sector Development Roadmap
- Conducting a Renewable Energy Development Workshop

“

Through the collaborative efforts of the ETP, Aquatera, and MENRE, the development of the BARMM Power Sector Development Roadmap amplifies our dedication to propelling the BARMM region towards innovative clean energy and sustainable development visions
